

QUICK LIKE A ZEBRA

From 0 to 3.0 metres per second. The m06 Strip Belt Merge »SBM« puts baggage on the right track like no other. It is exactly this construction – the design as an adjoining merge point – that can provide the fundamental advantage of operational safety. In the case of one strip being damaged, the system continues to work flawlessly. In connection with a belt deflector, the merge can also be used to transfer baggage with different angles.

PRODUCT FEATURES

- High level of operational safety through the strip design
- Extremely short construction lengths possible
- Very low construction height (approx. 130 mm)
- Cyclic operation possible
- »EIS system«: rapid assembly due to simple modular system, perfectly optimised for transportation
- Energy-efficient and economic design

FIELDS OF USE

Airport Solutions:

- Feeding baggage onto conveyor lines at different angles
- Feeding baggage onto sorters at different angles
- Distributing baggage in connection with a belt deflector at different angles

Intralogistic Solutions:

- Sorting systems in the post and parcel sector

TECHNICAL DATA

Conveyor speed	up to 3 m/s
Angles	30°, 45°, 60°
Belt width	up to 1,500 mm
Baggage weight	up to 75 kg

USED WORLDWIDE

FULL SERVICE BY MOTION06

motion06 develops, builds and installs the most intelligent conveyor systems for airports, intralogistics and industry. The foundations of our company are the highest quality standards, individual concepts and complete solutions, together with continual further development. Every one of our products stands for well thought-out, sophisticated technology, precision and intelligent simplicity. We consider project safety and speed in the implementation to be par for the course. Worldwide.
